In the last few years, research integrity has gained considerable visibility and relevance in the European research agenda. Research integrity and ethics also represent a significant part of the institutional policy of the University of Trento, which strongly pursues the satisfaction of the highest standards of research quality. From 2018 the University finances the interdepartmental project INTEGRA - Integrity of Trento Research, with the specific objective of developing interdisciplinary skills and support new initiatives and policies on research integrity. This workshop will represent an opportunity for the University to promote an open discussion on research integrity and ethics, with the active participation of International and national Experts together with Department/Center Delegates.

Chair
Carlo Casonato, Rector’s delegate to the Ethics Committee on Experiments involving human beings of UniTrento
