An Introduction to Scientometrics: Creating datasets and using CiteSpace

Vahid Aryadoust
National Institute of Education, Nanyang Technological University (Singapore)

7th - 8th January 2021
Thursday 7th January: 10:00AM - 12:30PM
Friday 8th January: 10:00AM - 12:30PM
Online Workshop offered through ZOOM Platform

Abstract:
Scientometrics is a field research that is concerned with the measurement of different features of the (un)published scholarly literature. This workshop is intended to provide an overview of Scientometrics. There are two main sections covered in the workshop: section one facilitates using Scopus and/or the Web of Science (WoS) to develop a suitable dataset for analysis. In addition, in the second section of the workshop, the participants will do hands-on practice to use CiteSpace, special software, for analyzing their datasets. Multiple approaches and considerations for running Scientometric analysis will be discussed and possible ways of interpreting outputs will be presented.
