VENUE

The course will be held in the Faculty of Engineering of the University of Trento, located in Mesiano, a small village on a hill to the east of the city of Trento.

Address: Via Mesiano 77, 38123 Trento

Once you are in Trento, you can reach Mesiano by taking bus number 5 (yellow line; direction “Oltrecastello”) from the bus stop in front of the train station (travel time: approximately 15 minutes). The bus also stops at a few locations in and around the city center before climbing the hillside.

The bus departs every 20 minutes and stops right in front of the University building (“Mesiano Fac. Ingegneria”).

Bus tickets cannot be bought on the bus, but they are sold inside the train station as well as at most newspaper kiosks in the city (price of a one-way ticket with 70-minute validity: 1.20 euros). Please remember tickets must be validated onboard using the dedicated machines.
Updated timetables and further information can be found at: http://www.ttesercizio.it/

How to reach Trento?

By train

Trento lies on the railway line connecting Bologna and Verona with Innsbruck (Austria) and Munich (Germany). Several regional trains as well as a few high-speed and long distance trains stop in Trento every day. Additionally, Trento is connected to Padua and Venice through the Valsugana railway (only regional trains). The latter has one stop right above the Faculty of Engineering (Povo-Mesiano station).

You can check train timetables on www.trenitalia.com (Italian railways) and www.bahn.de (German railways, but schedules for all trains in Europe are provided).

By plane

Trento does not have a commercial service airport. The nearest airports are:

Verona (90 km)
Venice (155 km)
Treviso (130 km)
Milan (Linate and Malpensa) (250 km)
Bergamo Orio al Serio (200 km)
Bologna (225 km)

Connections between the airports above and Trento generally require a shuttle ride to the airport’s nearest train station and a train ride to Trento. Check the connections before booking a flight to a specific airport.
