Two-day Workshop

Analyses with Longitudinal Data

Friday 8th April 2022, 10 a.m. - 6 p.m: Longitudinal Analysis

Friday 6th May 2022, 10 a.m. - 6 p.m: Longitudinal Structural Equation Modeling

Palazzo Piomarta, corso Bettini 84 - Rovereto (TN) - Italy

The Department of Psychology and Cognitive Science (University of Trento) will host a two-day workshop titled «Analyses with Longitudinal Data».

The workshop will be held by Professor Jason T. Newsom (Portland State University, Oregon, USA) thanks to a U.S. Fulbright Scholar Award.

He is expert in the fields of Quantitative Psychology and Health Psychology. He has published methodological and substantive articles in leading academic journals, such as Structural Equation Modeling: A Multidisciplinary Journal, Psychology and Aging, and Health Psychology, as well as a book titled Longitudinal structural equation modeling: A comprehensive introduction (2015, Routledge)

For further information about the workshops, registration and programme please see: www.unitn.it/analyses-longitudinal-data

The workshop is open to PhD student and Postdoctoral Researcher of University of Trento; PhD student and Postdoctoral Researcher in the field of Work and Organizational Psychology from other universities; Researchers from University of Trento or from other universities.

Maximum number of participations: 18
