the personalized immunotherapy of cancer**

Dr. Rosenberg is being honored with the 2022 Pezcoller-AACR Award in light of a series of landmark discoveries in the field of oncology that led to the development of pioneering cancer immunotherapies including IL-2 and chimeric antigen receptors (CARs)-T cells.

The Pezcoller Foundation-AACR International Award for Extraordinary Achievement in Cancer Research was established in 1997 to recognize a scientist who has made a major scientific discovery in basic cancer research, or who has made significant contributions to translational cancer research; who continues to be active in cancer research, and has a record of recent and noteworthy publications; and whose ongoing work holds promise for continued substantive contributions to progress in the field of cancer.
