Thursday 13 October 2022
12:30 – 14:00
Seminar Room – 3rd floor, Via Verdi 26 Trento
Marco Albertini

Sandwiched life courses.
Cross-national patterns and consequences on older people's well-being.

Marco Albertini is Full Professor at the University of Bologna and a founding member of the Computational Social Science Center. His research interests focus on intergenerational relations; the consequences of separation and divorce; the comparative study of inequality and social stratification; the consequences of childlessness; long-term care policies and aging.
