# ENERGY, ENVIRONMENT AND SOCIETIES IN CRISES

6<sup>th</sup> International joint conference  
ESA RN12 and Energy and Society Network  
**6-8 September, 2023**  
Trento, Italy

The conference calls for critical sociological reflections and empirical social investigations of energy transitions and changing energy systems in contexts of climate and energy emergencies, biodiversity loss, and environmental pollution crises.

This conference addresses energy as interconnected to multiple global crises, and challenges, and will place emphasis on the discussion of recovery, overcoming, metamorphosis and cooperation amid uncertain futures.

The conference is jointly organized by the European Sociological Association Research Network 12 'Environment and Society' and by the Energy and Society Network.

The conference is supported by the research group CoACT (Collective Action, Change and Transition) of the University of Trento, by Eurac Research and by the European Energy Research Alliance (EERA).

Under the patronage of:

PROVINCIA AUTONOMA DI TRENTO
