INDUSTRIAL PROBLEM SOLVING WITH PHYSICS

July 17-22, 2023

Polo Ferrari 2, via Sommarive, 9 - Povo, Trento

**Brains, are you ready for
a one-week project full of CHALLENGES?**

**Do you want to get your skills and ideas tested and
applied in a REAL industrial EXPERIENCE?**

**Then come to join the eighth edition
of Industrial Problem Solving with Physics on July 17-22!**

Industrial Problem Solving with Physics (IPSP) offers young researchers coming from different scientific backgrounds a unique chance for growing their expertise and a special opportunity for sharing their skills with companies.

IPSP2023 is a one-week event organized by the Department of Physics, the Doctoral Program in Physics and the Research Support and Valorisation Division of the University of Trento, in collaboration with Confindustria Trento, Polo Meccatronica - Trentino Sviluppo and from this year Hub Innovazione Trentino.

IPSP aims at creating a bridge for the transfer of know-how and human resources between the University and the world of industry: 3 companies and up to 30 brains (master students, PhD students, post docs and research fellows) will be selected to work in teams, trying to find solutions to the proposed problems.

The brains participating in the event will have the opportunity to tackle practical challenges, exploiting the transversal skills achieved during their studies. The participating companies, on their side, can obtain reliable solutions to the problems and experience an alternative problem-solving strategy. At the same time, they could scout young and talented people for professional collaborations.

Off-site candidates can apply for accommodation.

APPLICATION DEADLINE: April 14, 2023

SCIENTIFIC COMMITTEE

Sebastiano Mariazzi (Department of Physics, University of Trento)

Michele Orlandi (Department of Physics, University of Trento)

Alessio Perinelli (Department of Physics, University of Trento)

Tommaso Rosi (Department of Physics, University of Trento)

Luca Tubiana (Department of Physics, University of Trento)

ADVISORY BOARD

Franco Dalfovo (Department of Physics, University of Trento)

Giovanni Andrea Prodi (Doctoral Program in Physics, University of Trento)

Vanessa Ravagni (Directorate of Research Services and Valorization, University of Trento)

Alessandro Santini (Confindustria Trento)

Paolo Gregori (Polo Meccatronica - Trentino Sviluppo)

Luca Mion (Hub Innovazione Trentino)

CONTACTS

Organizing committee: ipsp2023@unitn.it

Department of Physics: df.supportstaff@unitn.it
