

UNIVERSITÀ
DI TRENTO

THE CONVENING CAPACITY OF SCIENCE

Seminary with Brian Brophy

Tuesday, November 21, 6.00 p.m.

Kessler Room, Palazzo di Sociologia
via Verdi, 26 - Trento

Why should we care about science? How can different audiences embrace the story of science into their own life-story? What is trustworthy science and how do we perform it through the media, the universities, the knowledge commons?

The talk-action will focus on the need to unite communities through art with science to imagine new futures for heightened meaningful interactions and research.

This event is part of the *Teatro delle Meraviglie's* programme.
