

NDRA-2024 Abstract Template

Title should be 14-point, centered, bold

Author name(s) [12-point, centered, bold] A. Einstein¹, E. Fermi^{1,2}, R. Feynman³
¹Author's affiliation and full address (10-point, centered, italic)

This is a sample document format for the one page abstract for submissions to the **Summer School on Neutron Detection and Related Applications**. The paper to be uploaded must be in **Word .doc, .docx or camera ready PDF format**.

Paper size should be A4 format (210 mm x 297 mm). Margins should be set for a 2.7 cm top, 2 cm bottom, 2.5 cm left, and right.

For text fonts: use only 12-point Times (roman, bold or italic), and Symbol. Sans Serif Fonts such as Arial can be used in Figures. Include all equations, drawings, figures and references within the **one page limit**. Avoid asterisks, acknowledgements, job descriptions or footnotes. **Do not add page numbers.**

Simple equations should be included in-line wherever possible. Figures should be relevant to the submission and preferably centered as shown below. Placing subfigures side-by-side is a convenient way to include multiple results within the one page limit. The figures can be provided in grayscale or colors. Figure captions should be centered beneath figures and in 10-point font. Figure captions should be indented 1 cm on both sides and justified on both right and left sides.

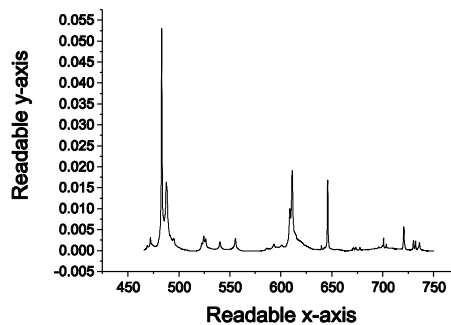

Fig. 1 The abbreviation “Fig.” (for figure) should appear first, followed by the figure number, a period, and then the figure caption.

References should appear at the end of the page in the order in which they are referenced. The font should be 10 point, and the references should be aligned left, as shown below. Within the main text, references should be designated by a number in brackets [1].

Please be concise in your presentation, highlighting what is novel and original about your submission.
